DESCRIPTION AND PURPOSE:

On October 4, 2005, ON Semiconductor released a General Announcement (#15026) stating our intent to convert our customers over to Pb-free products by the end of 2006. We also stated that our products are backwards compatible but excluded the T03 and T0-92 packages. These packages are now backward compatible. Customers who have not yet converted their board solder processes over to Pb-free should not delay as the Pb-free products supplied by ON Semiconductor can be used in standard SnPb and Pb-free processes.

NOTE: Exception for BGA and Flip Chip products. These packages are not backward compatible.
