NOTIFICATION TYPE:

Initial Product/Process Change Notification (IPCEN)

First change notification sent to customers. IPCENs are issued at least 120 days prior to implementation of the change. An IPCEN is advance notification about an upcoming change and contains general information regarding the change details and devices affected. It also contains the preliminary reliability qualification plan.

The completed qualification and characterization data will be included in the Final Product/Process Change Notification (FPCEN).

This IPCEN notification will be followed by a Final Product/Process Change Notification (FPCEN) at least 60 days prior to implementation of the change.

DESCRIPTION AND PURPOSE:

This is an Initial Product Change Notice to make customers aware that Hana Semiconductor (HANA), located in Ayutthaya, Thailand is being qualified as a supplemental assembly source for ON Semiconductor's Analog Micro08, Micro10, and TSOP5 products. Hana is a fully certified ISO9002 and QS9000 supplier. These packages are currently manufactured in ON Semiconductor's facility in Seremban, Malaysia. This is not a transfer but a capacity expansion. Device parameters will continue to meet all Data Book specifications, and reliability will continue to meet or exceed ON Semiconductor standards. Upon expiration of the FINAL PCN(s), the affected devices may be processed at either location depending on capacity requirements. FINAL PCN(s) will be issued as needed to accommodate the varying qualification schedules for the affected devices. Samples will be available once the FINAL PCN(s) is(are) published.

Initial Product/Process Change Notification #15339
