SUBJ: Upcoming EDI changes relating to ON Semiconductor's Catalyst Integration

DATE: July 13, 2009

Dear Customer,

The integration of ON Semiconductor and Catalyst Semiconductor is proceeding as planned and going well. We have a team of individuals fully dedicated to integrating Catalyst Semiconductor Electronic Data Interchange (EDI) trading partners into ON Semiconductor systems.

At this time, we predict our EDI cutover/integration date to be **August 31st, 2009**. We are in the process of finalizing these plans. At this time, we do not request any specific action to be taken. Additional communications will follow with more specific cutover/integration dates and actions.

Existing ON Semiconductor Trading Partners

What do existing ON Semiconductor EDI Trading Partners need to know about the upcoming Catalyst Semiconductor integration; what will we need you to do in support of our integration?

- No connectivity changes.
- No testing is planned unless requested by the Trading Partner.
- Vendor Code/Approved Vendor List/Purchase Order changes are required to point EDI data for Catalyst Semiconductor part numbers to the existing ON Semiconductor connection at the cutover date.

Your help and involvement in our integration efforts is critical to our success and we will communicate required actions and integration timing in future communications. If there are any issues that you can predict from your side with the stated actions and tentative timing of our integration, please contact us immediately.

Thank you and Best Regards,

**Service Engagement EDI Integration Team
ON Semiconductor**
