

Product Overview

CAT3648: LED Driver, 4-Channel with 32 Dimming Levels

For complete documentation, see the data sheet.

The CAT3648 is a high efficiency fractional charge pump that can drive up to four LEDs programmable by a one wire digital interface. The inclusion of a 1.33x fractional charge pump mode increases device efficiency by up to 10% over traditional 1.5x charge pumps with no added external capacitors. Low noise input ripple is achieved by operating at a constant switching frequency which allows the use of small external ceramic capacitors. The multi-fractional charge pump supports a wide range of input voltages from 2.4 V to 5.5 V. The EN/DIM logic input functions as a chip enable and a digital dimming interface for setting the current in all the LED channels. The 1-wire pulse-dimming interface supports 32 linear steps from full-scale down to zero current.

Features

- High efficiency 1.33x charge pump
- Quad-mode charge pump: 1x, 1.33x, 1.5x, 2x
- Drives up to 4 LEDs at 25 mA each
- 1-wire EZDim™; 32 linear steps
- Power efficiency up to 92%
- Low noise input ripple in all modes
- 'Zero' current shutdown mode
- Soft start and current limiting
- Short circuit protection
- Thermal shutdown protection

For more features, see the data sheet

Applications

- LCD Display Backlight

End Products

- Mobile Phones
- Digital Still Camera
