

Product Overview

MMBF5484: N-Channel RF Amplifier

For complete documentation, see the data sheet.

This device is designed primarily for electronic switching applications such as low On Resistance analog switching. Sourced from Process 50.

Applications

- This product is general usage and suitable for many different applications.

Part Electrical Specifications

Product	Compliance	Status	Channel Polarity	I _{DSS} Min (μA)	I _{DSS} Max (μA)	V _{(BR)GSS} Min (V)	C _{rSS} Max (pF)	C _{rSS} Max (pF)	Package Type
MMBF5484	Pb-free Halide free	Active	N-Channel	1000	5000	25	5	1	SOT-23-3
