

Product Overview

NTB30N06L: Power MOSFET 60V 30A 46mOhm Single N-Channel D2PAK with Logic Level

[For complete documentation, see the data sheet](#)

Product Description

Designed for low voltage, high speed switching applications in power supplies, converters and power motor controls and bridge circuits.

Features

- Power Supplies
- Converters
- Power Motor Controls
- Bridge Circuits
- Pb-Free Packages are Available
