## Setting Current Limit

FPF2895 current limit is set with an external resistor connected between ISET and GND. This resistor is selected using the following equation:

$$
\mathrm{R}_{\text {SET }}(\mathrm{k} \Omega)=4448.6 / \mathrm{I}_{\mathrm{LIM}}(\mathrm{~mA})
$$

(eq. 1)

The resistor can be selected using 0 . Resistor tolerance of $1 \%$ or less is recommended.
