Silicon Carbide (SiC) Module – EliteSiC Power Module for Traction Inverter, Single-Side Direct Cooling, 2.2 mohm, 900 V, 6-Pack

NVXR22S90M2SPB

Product Description
The NVXR22S90M2SPB is part of the EliteSiC power module for traction inverter, a revolutionary high mobility compound semiconductor product family that offers increased performance, better efficiency, and higher power density in similar and highly compatible packaging solutions.

The module integrates 900 V SiC MOSFET in a 6-pack configuration. For assembly ease and reliability, a new generation of press-fit pins are integrated into the power module for signal terminals. In addition, it also integrates an optimized pin-fin heatsink in the baseplate.

To enhance reliability and thermal performance, sintering technology is applied for die attach. The module is designed to meet AQG324 automotive standard.

Features
- Direct Cooling w/ integrated Pin-fin Heatsink
- Silicon Nitride Isolator
- \( T_{Vj,\text{Max}} = 175°C \) for Continuous Operation
- Automotive Grade SiC MOSFET Chip Technologies
- Sintered Die Technology for High Reliability Performance
- Easy to Integrate 6-pack Topology
- Automotive Module AQG324 Compliant
- These Devices are Pb-Free and are RoHS Compliant

Typical Applications
- Hybrid and Electric Vehicle Traction Inverter

Materials
DBC Substrate: Si₃N₄ isolated substrate, basic isolation
Terminals: Copper + Tin electro-plating
Signal Leads: Copper + Tin plating
Pin–fin Base plate: Copper + Ni plating

Flammability Information
The module frame meets UL94V–0 flammability rating

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

1. EPDM rubber 50 durometer ‘O’ ring used.
2. Verified by characterization/design, not by test.
