QRE1113, QRE1113GR, QRE1114GR

Miniature Reflective Object Sensor

Features
• Phototransistor Output
• No Contact Surface Sensing
• Miniature Package
• Lead Form Style: Gull Wing
• Two Leadform Options:
  ♦ Through Hole (QRE1113)
  ♦ SMT Gull Wing (QRE1113GR & QRE1114GR)
• Two Packaging Options:
  ♦ Tube (QRE1113)
  ♦ Tape and Reel (QRE1113GR & QRE1114GR)

MAXIMUM RATINGS (TA = 25°C unless otherwise noted)

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.
1. Derate power dissipation linearly 1.00 mW/°C above 25°C.
2. RMA flux is recommended.
3. Methanol or isopropyl alcohols are recommended as cleaning agents.
4. Soldering iron 1/16" (1.6 mm) from housing.
5. Pulse conditions: tp = 100 μs; T = 10 ms.

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

6. Measured using an aluminum alloy mirror at d = 1 mm.

7. No reflective surface at close proximity.

Precautionary Notes
1. Refer to application note AND8003/D, “Storage and Handling of Dry Packed Surface Mounted Devices” for details of handling procedure.
2. Product soldering terminals are silver plated and oxidization may occur with prolonged exposure to ambient environment. Oxidized terminal may have poor solderability performance. Keep unsealed devices in moisture barrier bag sealed with desiccant or in dry cabinet at <5% relative humidity.
3. Store PCB in sealed moisture barrier bag together with desiccant or store in dry cabinet at <5% relative humidity. Mounted device that has been exposed to ambient environment for long period of time may suffer moisture related damage if PCB is subjected to subsequent high temperature processes.
