

AP1302

Image Signal Processor, 13 MP

Product Overview

For complete documentation, see the data sheet.

AP1302 is an imaging co-processor capable of processing up to 13 MP **onsemi** primary camera as well as a front facing camera. AP1302 has the ability to handle all image processing functions including interlaced High Dynamic Range (iHDR) operations.

Features

- Primary camera interface
 - Primary camera input format
 - Output interface
 - Output format
 - Secondary camera interface
 - Maximum resolution
 - Maximum frame rate
 - Maximum colour processing frequency
 - ISP capabilities on chip
 - Digital features
- For more features, see the data sheet

Applications

- Image Signal Processing

End Products

- IoT
- Drones
- Machine Vision
