

## NTMFS4935N

# Single N-Channel Power MOSFET 30V, 93A, 3.2mΩ

## Product Overview

For complete documentation, see the data sheet.

This is a 30 V N-Channel Power MOSFET.

### Features

- Low  $r_{DS(on)}$  to Minimize Conduction Loss
- Low Capacitance
- Optimized Gate Charge
- RoHS Compliant

### Applications

- CPU Power Delivery
- DC-DC Converters

### Benefits

- Improve System Efficiency
- Minimize Driver Losses
- Minimize Switching Losses

### End Products

- Notebook, Desktop, Server, Game Consoles, Point of Load and other Computing Products
