

Product Overview

FJN4302R: PNP Epitaxial Silicon Transistor with Bias Resistor

For complete documentation, see the data sheet.

Transistors with built-in resistors can be excellent space- and cost-saving solutions by reducing component count and simplifying circuit design.

Features

- 100 mA Output Current Capability
- Built-in Bias Resistor ($R1=10K\Omega$, $R2=10K\Omega$)

Applications

- This product is general usage and suitable for many different applications.
