

Product Overview

MMBD4448: High Conductance Fast Diode

For complete documentation, see the data sheet.

The high breakdown voltage, fast switching speed and high forward conductance of this diode packaged in a SOT-23 Surface Mount package makes it desirable also as a general purpose diode.

Features

- 350 milliwatt Power Dissipation package
- High Breakdown Voltage, Fast Switching Speed
- Typical capacitance less than 1.5 picofarad

Applications

- This product is general usage and suitable for many different applications.
