

Product Overview

NTD4963N: Power MOSFET 30V 44A 9.6 mOhm Single N-Channel DPAK

For complete documentation, see the data sheet.

Power MOSFET, Single N Channel 30V, 55A, DPAK

Features

- Low RDS(on)
- Low Qg and Qgd
- Low Capacitance

Applications

- DC-DC Converter, Power Load Switch, Motor Control

Benefits

- Improve System Efficiency
- Improve Switching Performance
- Minimize Driver Losses

End Products

- PC, Game Console, Printer, Set Top Box, and other computing and consumer end products
