

Product Overview

NVD5862N: Power MOSFET 60V, 98A, 5.7 mOhm, Single N-Channel, DPAK.

For complete documentation, see the data sheet.

Automotive Power MOSFET. 60V, 98A, 5.7 mOhm, Single N-Channel, DPAK. AEC-Q101 Qualified MOSFET and PPAP capable suitable for automotive applications.

Features

- Low on resistance
- High current capability
- 100% Avalanche energy tested

Applications

- Automotive Motor Drivers
- Automotive Low and High Side Drivers

Benefits

- Provides low conduction losses
- Provides robust load performance
- Safeguards against voltage overstress

End Products

- Automotive HVAC systems
- Automotive Braking systems
