

## Product Overview

### NCV6356: Synchronous Buck Converter, Processor Supply, I2C Programming, 5.0 A

For complete documentation, see the data sheet.

The NCV6356 is a synchronous AOT (Adaptive On-time) buck converter optimized to supply the different sub systems of automotive applications post regulation system up to 5 V input. The device is able to deliver up to 5.0 A, with programmable output voltage from 0.6 V to 1.4 V. Operation at up to 2.4 MHz switching frequency allows the use of small components. Synchronous rectification and automatic PFM Pseudo-PWM (PPWM) transitions improve overall solution efficiency. The NCV6356 is in low profile 3.0 x 4.0 mm DFN-14 package.
