

Product Overview

NCV7708E: Double Hex Driver

For complete documentation, see the data sheet.

The NCV7708E is a fully protected Hex-Half Bridge-Driver designed specifically for automotive and industrial motion control applications. The six low and high side drivers are freely configurable and can be controlled separately. This allows for high side, low side, and H-Bridge control. H-Bridge control provides forward, reverse, brake, and high impedance states. The drivers are controlled via a standard SPI interface.
