

Product Overview

NCP431: Voltage Reference, Low Cathode Current, Programmable, Shunt Regulator

For complete documentation, see the data sheet.

The NCP431 integrated circuits are three-terminal programmable shunt regulator diodes. They are a direct upgrade to the industry standard TL431A. These monolithic IC voltage references operate as a low temperature coefficient zener which is programmable from V_{ref} to 36 V using two external resistors. These devices exhibit a wide operating current range of 40 μ A to 100 mA with a typical dynamic impedance of 0.22 Ω . The characteristics of these references make them excellent replacements for zener diodes in many applications such as digital voltmeters, power supplies, and op amp circuitry. The 2.5 V reference makes it convenient to obtain a stable reference from 5.0 V logic supplies, and since the NCP431 operates as a shunt regulator, it can be used as either a positive or negative voltage reference. Low minimum operating current makes this device an ideal choice for secondary regulators in SMPS adapters with extremely low no-load consumption. The NCP432 has exactly the same functionality and electrical specifications as the NCP431, but has an alternate pin configuration.

Features

- Low Minimum Operating Current: 40 μ A, Typ @ 25C
- Voltage Reference Tolerance: 1%, Typ @ 25C
- Programmable Output Voltage to 36 V
- Low Dynamic Output Impedance, 0.22ohm Typical
- Temperature Compensated for Operation over Full Rated Operating Temperature Range
- Equivalent Full Range Temperature Coefficient of 50 ppm/CTypical
- NCP431 is pin compatible to the TL432
- NCP432 is pin compatible to the TL431

Applications

- Switchmode Power Supplies
- Instrumentation

Benefits

- Reduced power consumption
- Accurate Reference Voltage
- Allows for use in a broad range of applications
- High and stable gain even at very low cathode current operation
- Accurate and reliable operation over the temperature range
- Accurate reference across temperature
- Easily upgrade performance with no board level change
- Alternate pin configuration

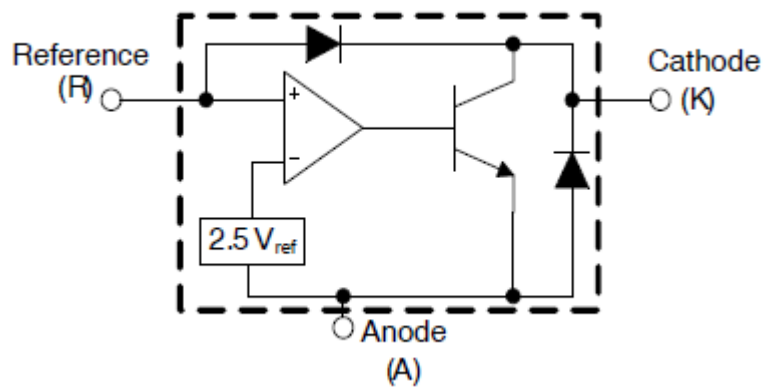

End Products

- Adapters
- Flat TVs
