

Product Overview

AR0833: CMOS Image Sensor, 8 MP, 1/3"

For complete documentation, see the data sheet.

The AR0833 image sensor is a 1/3.2" optical format 1.4-micron pixel sensor with the speed to capture the its full 8 MP sensor resolution at a rapid 30 frames per second. A-PixHS² technology brings together ON Semiconductor's second generation backside illuminated (BSI) pixel technology and an advanced high speed sensor architecture to enable a number of innovative features. It is designed to enable low z-height camera modules to meet OEM and mobile device manufacturers' needs.

Features

- High Dynamic Range

Applications

- Mobile
