

## Product Overview

### KAE-04471: Interline Transfer EMCCD Image Sensor, 4.4 MP

For complete documentation, see the [data sheet](#).

This product is not recommended for new designs

The KAE-04471 Image Sensor is a 4.4 Mp, 4/3" format, Interline Transfer EMCCD image sensor that provides exceptional imaging performance in extreme low light applications. Each of the sensor's four outputs incorporates both a conventional horizontal CCD register and a high gain EMCCD register.

An intra-scene switchable gain feature samples each charge packet on a pixel-by-pixel basis. This enables the camera system to determine whether the charge will be routed through the normal gain output or the EMCCD output based on a user selectable threshold. This feature enables imaging in extreme low light, even when bright objects are within a dark scene, allowing a single camera to capture quality images from sunlight to starlight.
