300 W Lighting Solution with NCL30125 Evaluation Board User's Manual

Circuit Description

This user's manual provides elementary information about a two-switch forward converter built with the NCL30125 operated in current-mode control. This controller offers many features to build an energy efficient converter with all the needed protections like cycle-by-cycle current limit with a 500-mV sense voltage, over temperature protection with a dedicated NTC pin and brown-out feature. In addition to the low side MOSFET drive, the controller integrates also a high-side section to drive the floating N-channel power MOSFET. Dedicated pins are available to adjust the switching frequency (RT pin – pin 6) or the soft-start duration (SS pin – pin 7). Finally, a high-voltage current source with Dynamic-Self Supply (DSS) is embedded to quickly start the power supply and maintain the Vcc voltage in light load or standby. The primary-side section drives a transformer whose primary inductance is 3 mH. The energy accumulated in this inductance is sending back to the bulk capacitor thanks to the

EVAL BOARD USER'S MANUAL

freewheel components. One of the classical freewheel diode has been replaced by a MOSFET Q3 driven by the controller in order to refresh the bootstrap capacitor. The current is sensed via a 83-mΩ resistance. The switching frequency of 100 kHz and the soft-start duration are set by two individual components (R8 for fSW and C5 for SS).

The power stage is made of two switching N-channel transistors Q1 and Q2. These two transistors are switched in same time and seen the input voltage as maximum. In the secondary side, D13 and D15 constitute Rectifier and Freewheel part. The regulation is ensured by a TL431.

Table 1.

Device	Application	Input Voltage	Output Power	Topology	I/O Isolation
NCL30125	Lighting	180 to 264 Vac	300 W	Two-Switch Forward	Isolated

Table 2.

	Output Specification
Output Voltage	12 V
Nominal Current	12 V/25 A
Max Current	12 V/30 A
Min Current	zero

Table 3.

Avg. Efficiency	>88% @ 12 V 25 A at board end, 230 Vac
Ripple	<240 mV
Standby Power	<0.3 W @ 12 V & 230 Vac
Power Density	2 W/cm ³
Protection	OCV, OVP
Size	L x W x H = 300 x 50 x 35 mm

Key Features

- Two-Switch topology current mode control
- A simple control circuit without a driver transformer
- Rated Output power: 300 W
- Standby power: <0.3 W in Universal AC input voltage
- Full load Efficiency: >88% @ at board end, 230 Vac input
- Completed protection: OCP,OVP
- Brown-out protection
- Switching frequency: ~100 kHz

onsemi, **Onsemi**, and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "**onsemi**" or its affiliates and/or subsidiaries in the United States and/or other countries. **onsemi** owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of **onsemi**'s product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. **onsemi** is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.

The evaluation board/kit (research and development board/kit) (hereinafter the "board") is not a finished product and is not available for sale to consumers. The board is only intended for research, development, demonstration and evaluation purposes and will only be used in laboratory/development areas by persons with an engineering/technical training and familiar with the risks associated with handling electrical/mechanical components, systems and subsystems. This person assumes full responsibility/liability for proper and safe handling. Any other use, resale or redistribution for any other purpose is strictly prohibited.

THE BOARD IS PROVIDED BY ONSEMI TO YOU "AS IS" AND WITHOUT ANY REPRESENTATIONS OR WARRANTIES WHATSOEVER. WITHOUT LIMITING THE FOREGOING, ONSEMI (AND ITS LICENSORS/SUPPLIERS) HEREBY DISCLAIMS ANY AND ALL REPRESENTATIONS AND WARRANTIES IN RELATION TO THE BOARD, ANY MODIFICATIONS, OR THIS AGREEMENT, WHETHER EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING WITHOUT LIMITATION ANY AND ALL REPRESENTATIONS AND WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, AND THOSE ARISING FROM A COURSE OF DEALING, TRADE USAGE, TRADE CUSTOM OR TRADE PRACTICE.

onsemi reserves the right to make changes without further notice to any board.

You are responsible for determining whether the board will be suitable for your intended use or application or will achieve your intended results. Prior to using or distributing any systems that have been evaluated, designed or tested using the board, you agree to test and validate your design to confirm the functionality for your application. Any technical, applications or design information or advice, quality characterization, reliability data or other services provided by **onsemi** shall not constitute any representation or warranty by **onsemi**, and no additional obligations or liabilities shall arise from **onsemi** having provided such information or services.

onsemi products including the boards are not designed, intended, or authorized for use in life support systems, or any FDA Class 3 medical devices or medical devices with a similar or equivalent classification in a foreign jurisdiction, or any devices intended for implantation in the human body. You agree to indemnify, defend and hold harmless **onsemi**, its directors, officers, employees, representatives, agents, subsidiaries, affiliates, distributors, and assigns, against any and all liabilities, losses, costs, damages, judgments, and expenses, arising out of any claim, demand, investigation, lawsuit, regulatory action or cause of action arising out of or associated with any unauthorized use, even if such claim alleges that **onsemi** was negligent regarding the design or manufacture of any products and/or the board.

This evaluation board/kit does not fall within the scope of the European Union directives regarding electromagnetic compatibility, restricted substances (RoHS), recycling (WEEE), FCC, CE or UL, and may not meet the technical requirements of these or other related directives.

FCC WARNING – This evaluation board/kit is intended for use for engineering development, demonstration, or evaluation purposes only and is not considered by **onsemi** to be a finished end product fit for general consumer use. It may generate, use, or radiate radio frequency energy and has not been tested for compliance with the limits of computing devices pursuant to part 15 of FCC rules, which are designed to provide reasonable protection against radio frequency interference. Operation of this equipment may cause interference with radio communications, in which case the user shall be responsible, at its expense, to take whatever measures may be required to correct this interference.

onsemi does not convey any license under its patent rights nor the rights of others.

LIMITATIONS OF LIABILITY: **onsemi** shall not be liable for any special, consequential, incidental, indirect or punitive damages, including, but not limited to the costs of requalification, delay, loss of profits or goodwill, arising out of or in connection with the board, even if **onsemi** is advised of the possibility of such damages. In no event shall **onsemi**'s aggregate liability from any obligation arising out of or in connection with the board, under any theory of liability, exceed the purchase price paid for the board, if any.

The board is provided to you subject to the license and other terms per **onsemi**'s standard terms and conditions of sale. For more information and documentation, please visit www.onsemi.com.
