DESCRIPTION AND PURPOSE

Some contracts were signed many years ago between Motorola and its customers to implement Ship-To-Line, (STL), or Ship-To-Stock, (STS), programs. The contracts enabled the suppression of the customer's incoming inspection on the products, and defined the responsibility of Motorola on the Quality of the delivered components. "Ship-To-Line" or "Ship-To-Stock" was written on the delivery and

billing documents, and "Ship-To-Line" labels were attached to the packings.

Thanks to the continuous improvement programs in product development and manufacturing operations, ON Semiconductor has now reached a high level of performance and Quality on all the products delivered to its customers, such that all products now consistently exceed "Ship-To-Line" and "Ship-To-Stock" requirements. In order to improve its service Quality, ON Semiconductor started to contact its customers for which STL or STS programs are still active. The objective is to define a new way of administrating these programs, by reinforcing the commitment to continuously improve the Quality of the products and services, and by suppressing the attachment of "Ship-To-Line" or "Ship-To-Stock" labels on the documents and packings.

ON Semiconductor plans to have contacted its customers by the end of September 2000. If you were not contacted before August for the review of the contract you had previously signed with Motorola, please contact your Sales representative or Nathalie Dunouau in Toulouse, France, at 33 5 61 19 93 50. A new document will be defined with you.
