Initial Product/Process Change Notification (IPCN)

First change notification sent to customers. IPCNs are issued at least 120 days prior to implementation of the change. An IPCN is advance notification about an upcoming change and contains general information regarding the change details and devices affected. It also contains the preliminary reliability qualification plan.

The completed qualification and characterization data will be included in the Final Product/Process Change Notification (FPCN).

This IPCN notification will be followed by a Final Product/Process Change Notification (FPCN) at least 60 days prior to implementation of the change.

DESCRIPTION AND PURPOSE:

To continuously improve and expand our manufacturing capacity, ON Semiconductor would like to announce the SOEIAJ 14/16/20L package qualification of a new assembly site. Current SOEIAJ 14/16/20L assembly site is ASECL, and final test sites are ASECL and ON Semiconductor Philippines (OSPI). ASECL has announced to end-of-life this business effective June 30, 2006. To continue this assembly production, ON Semiconductor will transfer the assemble line to Mitsui High-Tech (MHT). Mitsui located in Kumamoto, Japan is an ON Semi qualified assembly site for other packages, currently assembling TSSOP 24L and SOEIAJ 8L products. This site has an excellent quality track record and is TS16949 and ISO14001 certified. MHT has assembly, test and leadframe fabrication in the same location. Assembly process will be identical to current EIAJ 8L line. All electrical characteristics will not change, and product reliability will continue to meet ON Semi's high quality standards. This assemble site will allow ON Semiconductor to continue supporting customer demand for SOEIAJ 14/16/20L products.
