Final Product/Process Change Notification (FPCN)

Final change notification sent to customers. FPCNs are issued at least 90 days prior to implementation of the change.

ON Semiconductor will consider this change approved unless specific conditions of acceptance are provided in writing within 30 days of receipt of this notice. To do so, contact <quality@onsemi.com>.

DESCRIPTION AND PURPOSE:

FPCN #16231 was issued on March 12, 2009 to begin using Copper wire on the IC SOT223 assembly line located in Seremban, Malaysia. The line has now been in production for several years using the Copper process. A new device was introduced shortly after the original FPCN was issued and was not included on the original FPCN.

The purpose of this FPCN is to add this one device family to the list of qualified products using the Copper Process. At the expiration of this FPCN, the below listed parts may be supplied with either Gold (Au) or Copper (Cu) wire bonds.
