Voice Controlled Bluetooth Speaker

Embedded World 2020

Public Information

Voice Controlled Bluetooth® Speaker

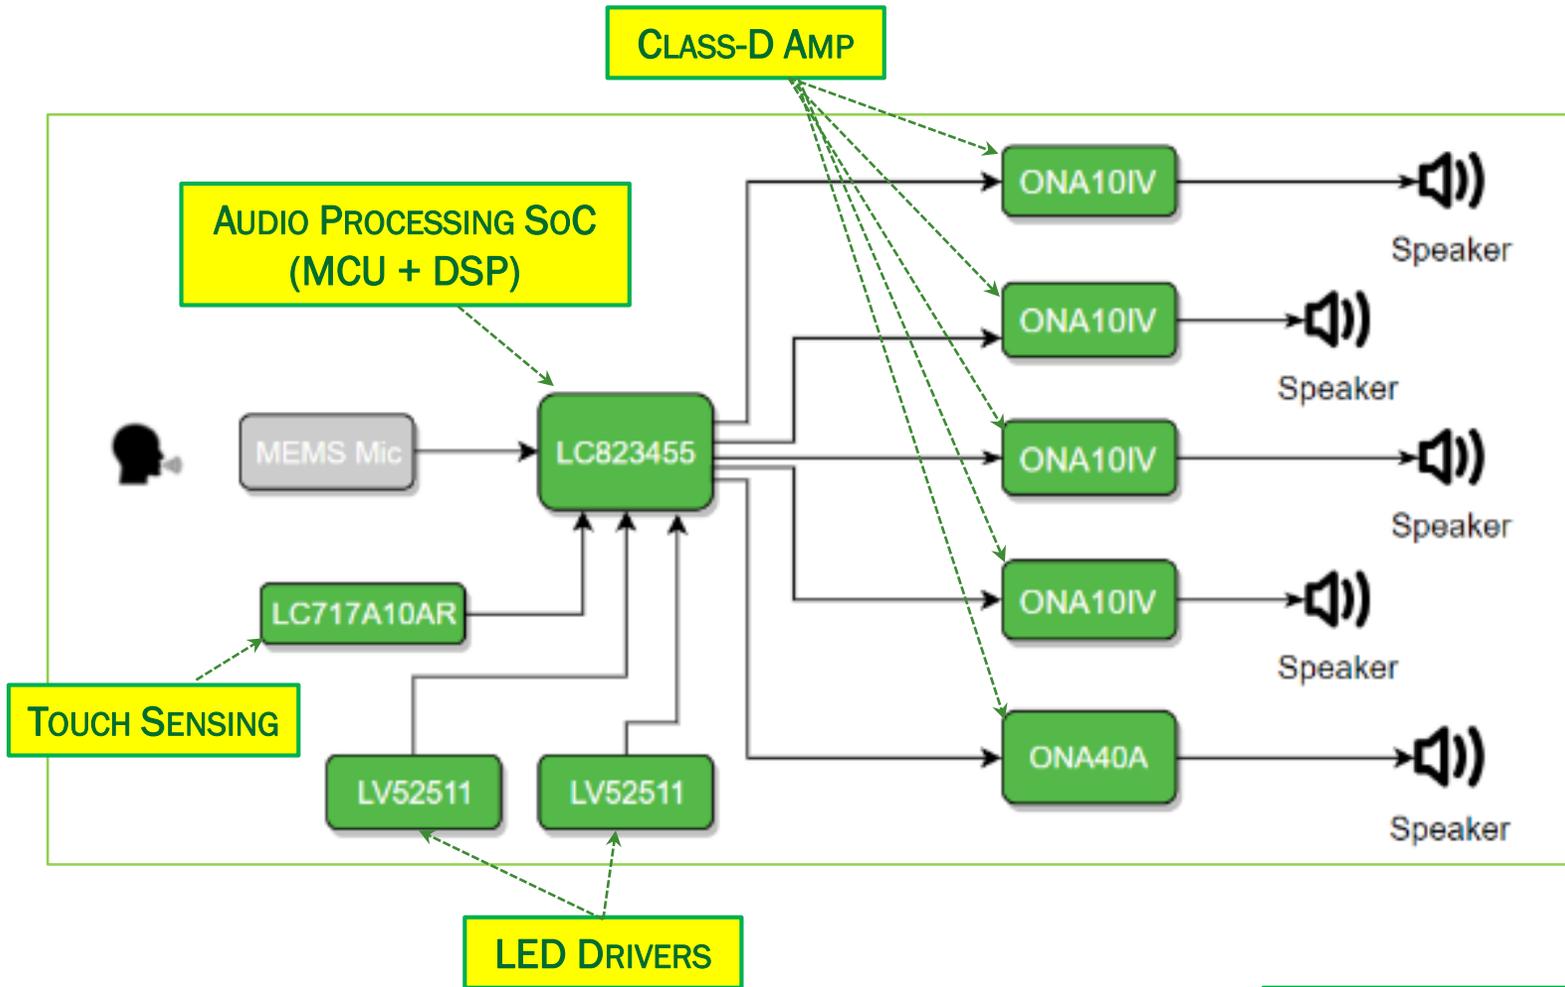

- Power efficient 4x1 stereo system featuring:
 - 4x16W Class-D Amplifiers (ONA10IV)
 - 1x40W Class-D Amplifier (ONA40A) – used for bass
- Controlled by the LC823455, Low Power & High-Res Audio Processing System LSI SoC.
- Capable of streaming music over Bluetooth
- Voice User Interface (VUI) responding to vocal commands
- Capacitive touch sensing HMI keyboard based on LC717A10
- Multichannel LED Drivers – LV52511
- PC GUI interface with STRATA

Public Information

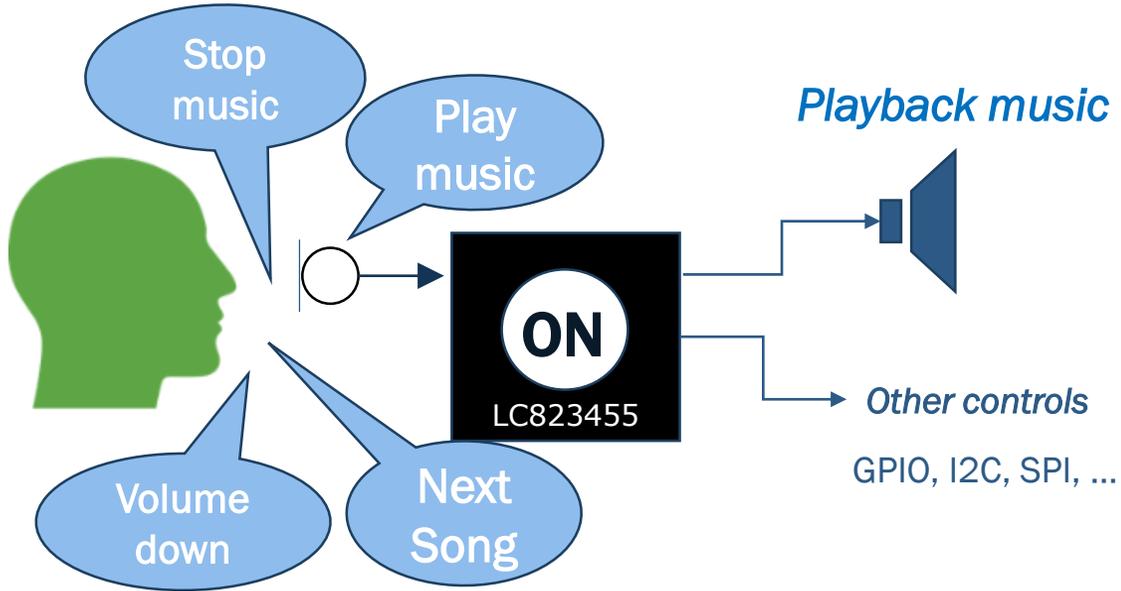

Voice Controlled Bluetooth® Speaker – Full System Solution

PLUS OTHER PARTS SUCH AS USB-C CONTROLLER, DIGITAL MIC, PoL...

Voice Controlled Bluetooth® Speaker – Connectivity & Software

Bluetooth Speaker

Volume: MASTER, BASS

Equalizer: 32Hz, 64Hz, 125Hz, 250Hz, 500Hz, 1kHz, 2kHz, 4kHz, 8kHz, 16kHz

PC GUI CONTROLS

SMARTPHONE MUSIC STREAMING

Public Information

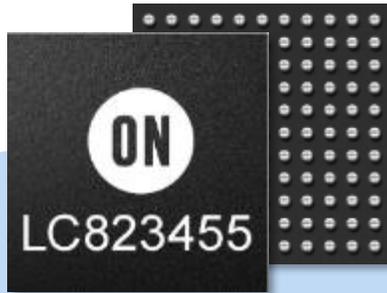

Voice Controlled Bluetooth® Speaker – Audio System on Chip

✓ *Extensive Capability*
Codecs, peripherals, ...

✓ *Superior performance*
Dual MCU + DSP

✓ *Smallest size*

✓ *Ultra Low Power*

Voice Recorders

Music Players

Sports Headsets

Bluetooth Speakers

WLAN Speakers

Smart Home with WLAN / BT

Voice User Interface

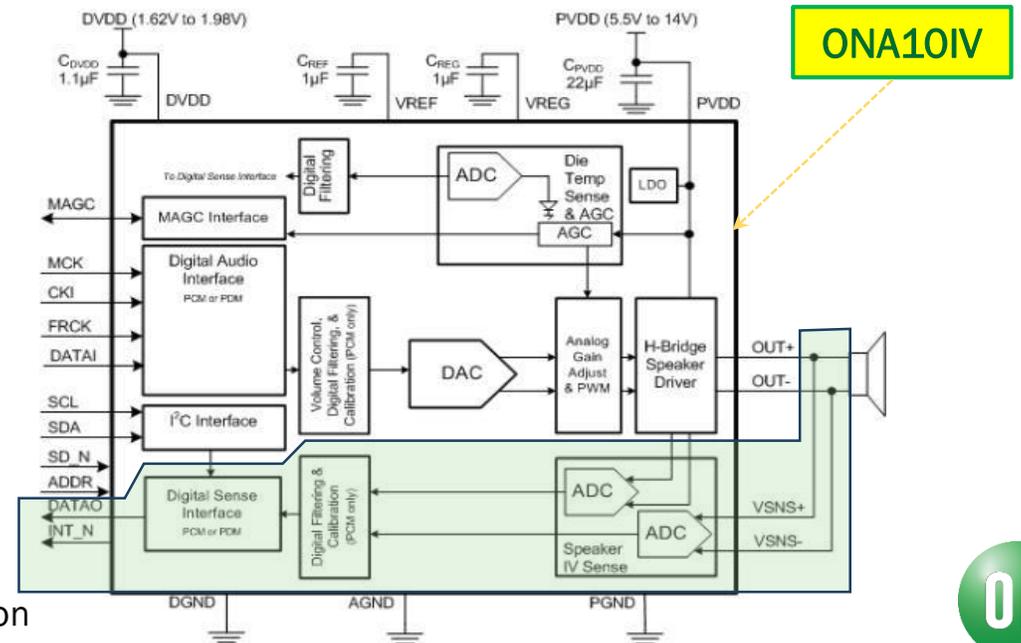

Voice Controlled Bluetooth® Speaker – Class-D Amplifier (ONA10IV)

The ONA10IV is a 16W digital input, mono Class-D audio amplifier featuring:

- a) real time, integrated current and voltage loudspeaker sensing.
- b) data transmission to the host through a separate digital output;
- c) Possibility to directly connected to 2S or 3S
- d) Fast automatic gain control (AGC) for brownout protection

Benefits of Speaker I/V sense:

- 1) Fast Speaker Integrity and Quality Assurance
- 2) Impedance & Resonance Measurement.
- 3) Diagnostics
- 4) Speaker Specific Characterization (aging)
- 5) Fault discovery
- 6) Frequency Response Monitoring
- 7) Speaker Protection
- 8) Over Drive Damage Prevention
- 9) Audio Algorithm Effects Feedback

Public Information

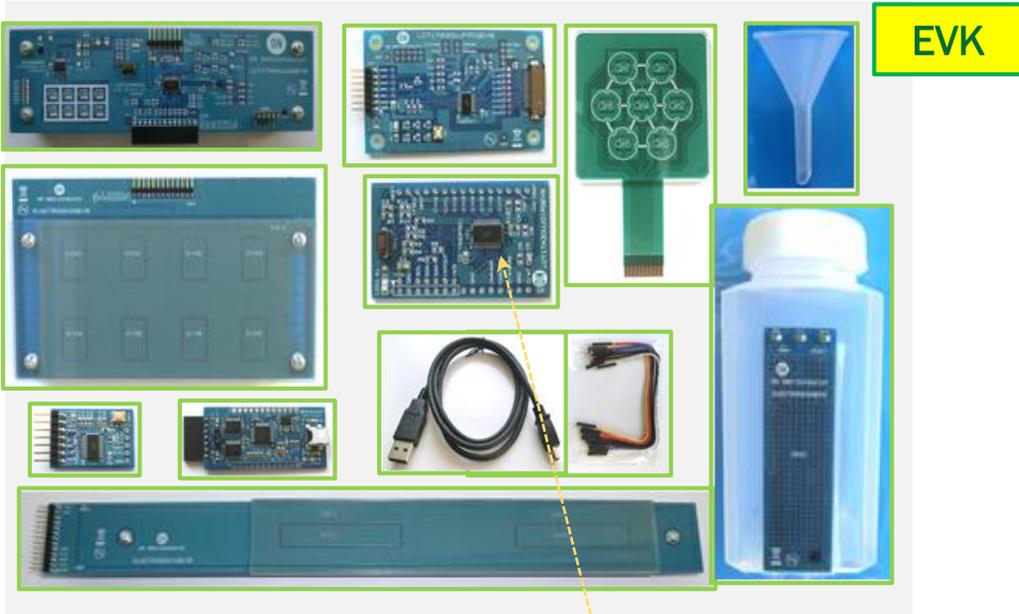

Voice Controlled Bluetooth® Speaker – Capacitive Touch Sensing

The LC717A10AJ is a high-performance – high sensitivity and low-cost capacitance-digital-converter LSI for electrostatic capacitive touch sensing human machine interfaces (HMI)
